Use the casefinding lists to screen prospective cases and identify cancer cases for inclusion in the registry. A casefinding list is **not** the same as a reportable list. Casefinding lists are intended for searching a variety of cases so as not to miss any reportable cases.

Definition of **Casefinding** (case ascertainment): Process of identifying all reportable cases through review of source documents and case listings. Casefinding covers a range of cases that need to be assessed to determine whether or not they are reportable.

Cancer registries and cancer surveillance programs typically describe the reportable neoplasms as any neoplasm with a behavior code (fifth digit in a complete six-digit morphology code) of '/2' (in situ) or '/3' (invasive). Some registries also collect and report the benign ('/0') and borderline ('/1') neoplasms.

Expanded versions of the casefinding lists include additional reportable terms, notes, and explanations. Short versions are provided for use in IT programming.

Current Lists

FY2024 ICD-10-CM Casefinding List [[PDF Format](#) (PDF, 465 KB)] [[Excel Format](#) (XLSX, 62 KB)]

Effective dates: 10/1/2023 - 9/30/2024

Refer to the [Historical Staging and Coding Manuals](#) for previous versions of the lists.

Active Surveillance / Watchful Waiting

Remember to add the date the physician and patient make the decision for active surveillance or watchful waiting under 'Date No First Therapy'

Example: 62-year-old married, white, non-Hispanic, male presents to ER c/o AMS where a mass was noted on 1/7/2024 imaging. After review of imaging, neurologist and patient opted for watchful waiting on 4/2/2024 with yearly Brain MRIs.

PT & MD opted for AS on 4/2/24 per D/C summary in EPIC. --tlsum681 2024/5/6 11:50:10--

KCR Tasks

- HL7 Audits
 - Michele Hoskins [michele.hoskins@uky.edu]
- Possible Missed Case list
 - Kim Kimbler [kimberlyk@uky.edu]
- Death Clearance
 - Danielle Darsey [danielle.darsey@uky.edu]
- Errata
 - Desiree Montgomery [desiree.montgomery@uky.edu]

Breadcrumbs needed!

Text for audits/lists and cases deleted from CPDMS.

Please provide clear and concise text on *why* a case is not reportable by your facility and any additional help where the patient might have been from or referred to.

Bad

- “COC 30 / 32”
- “NR” / “NRF”
- “Pt dx at OSF”

Good

- **COC: 30**, patient was diagnosed at Priority Radiology and only a path consult was performed at Norton.

Good

- **COC: 32**, patient was diagnosed on CT scan 2/4/24 in Madison, IN, had PET Scan at KDH only and referred to UK.
- **“NR/NRF”**: Pt came to St. Joseph for a benign brain MRI ordered by Dr. Maury Povich. Unknown where patient was referred.”
- **Deleting case from CPDMS**: “Case NR, patient diagnosed in 2013 in Michigan with prostate cancer, 2024 case entered is after progression of disease now with bone mets.”
